

60 SECOND

APF Topical Fluoride Gel

A fast-acting fluoride gel that is easily used in the comfort of one's own home.

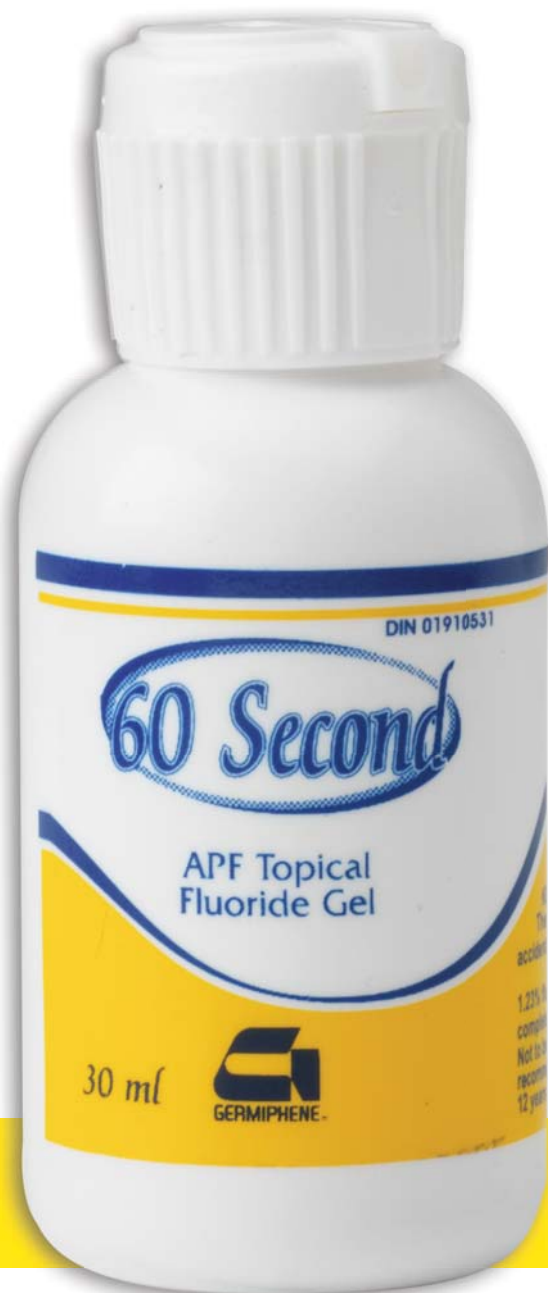

60 Second Gel HT is a topical fluoride gel for use in the home setting as part of a regular oral care routine. Patients can use 60 Second Gel HT once daily after flossing and brushing with their regular toothpaste to help prevent decay and the formation of caries.

The optimized pH 4 gel delivers a high uptake of fluoride in only one minute. After use, patients simply expectorate the gel and can resume eating and drinking after 30 minutes. With regular long term use, 60 Second Gel HT can also help reduce tooth sensitivity.

60 Second Gel HT is ideal for patients who need more than the recommended bi-yearly fluoride treatments offered in the dental office. Such patients include those with xerostomia, where the use of 60 Second Gel HT helps replace calcium and phosphate ions normally supplied by saliva.

- Assorted flavours for greater patient acceptance
- Non-invasive home treatment used only once daily
- Delivers maximum fluoride uptake in just 1 minute
- Adheres closely to enamel and interproximal areas
- Protects against dental caries

Fast, efficient fluoride treatments at home!
