PRODUCT PROFILE

BUFF Prophy Jet Powder

Superior polishing to reveal brighter smile. Buff is an effective prophy powder that leaves mouths feeling clean and refreshed. Buff removes most stubborn and havey stains. Buff gently, yet thoroughly cleans the tooth surface, penetrating into pits, fissures and interproximal areas. Any calculus deposits are washed away easily without tissue laceration. Buff is designed with “aero flow” anti-clogging agents to deliver a trouble-free performance in air polishing units, ensuring an even and maximum flow of posder is continually applied on each patient.
