

# PRODUCT PROFILE

## **FLOAM** DIN 02198703

<b>Product</b>	APF Topical Foam Fluoride.
<b>Description</b>	For topical application to aid in the protection against dental caries. <b>FLOAM</b> has the following composition: Sodium Fluoride Hydrofluoric Acid (equivalent to 1.23% Fluoride Ion).
<b>Function</b>	Floam inhibits caries formation by reducing enamel solubility and enhancing remineralization.
<b>Packaging</b>	Available in 125 gm aerosol containers in the following flavours: Mint, Orange Cream, Strawberry, Grape, Bubblegum, Melon and Banana Split. Provides 130 applications, based on .959 gm per usage. Also available in Neutral pH: Cherry, Mint and Strawberry.

Features	Benefits
<i><b>Patient Safety</b></i>	<b>FLOAM</b> fluoride concentration is identical to 1.23% APF gel, but because it is less dense, requires one-fourth as much fluoride decreasing risk of fluoride ingestion!
<i><b>Non-Gagging</b></i>	<b>FLOAM</b> is unlikely to overflow applicator tray thus reducing potential for gagging and ingestion.
<i><b>Convenient</b></i>	The mousse-size container, with 100+ large tray applications, is compact, easy-to-handle and easy-to-store. A simple finger touch to the nozzle distributes the foam accurately and consistently into the tray.
<i><b>Unsurpassed Coverage</b></i>	In <b>FLOAM</b> , fluoride is continuously supplied to the enamel as thousands of bubbles collapse on the tooth surface releasing fluoride, providing continuous coverage, especially interproximally.
<i><b>Patient Acceptance</b></i>	<b>FLOAM's</b> light, airy foam consistency is pleasantly flavoured with no bitter after taste. Safe for use as a 1 minute or 4 minute formula.
<i><b>Saves Valuable Time</b></i>	<b>FLOAM</b> clears easily and quickly from mouth and will not clog suction systems.
