

PRODUCT PROFILE

Freez-eez **DIN 02245342**

Product	Topical Anesthetic Gel
Description	FREEZ-EEZ is an oral topical anesthetic gel that minimizes pain in the oral mucosal tissue.
Packaging	30 g jar

Features	Benefits
<i>Rapid Onset Of Action</i>	20% benzocaine rapidly produces topical anesthesia within 30 seconds of application to the mucosal tissue.
<i>Assorted Flavours</i>	Great tasting flavours to enhance patient comfort.
<i>Economical</i>	A small amount of FREEZ-EEZ ensures anesthesia.
<i>Multi-Purpose</i>	FREEZ-EEZ provides temporary relief of pain during procedures including local anesthetic injections, periodontal curettage, impression taking, intra-oral radiographs, scaling, root planning and prophylaxis. The gel also comforts patients with ulcers, wounds and other minor mouth irritations.
