

Freez-eez

Topical Anesthetic Gel

A fast-acting topical anesthetic gel to ease patient discomfort during routine procedures.

Freez-eez is a fast acting 20% benzocaine topical anesthetic gel.

Freez-eez can be used to provide temporary relief of pain during procedures including local anesthetic injections, clamp or crown replacement or suture removal.

Usage of Freez-eez also comforts patients with ulcers, wounds and other minor mouth irritations.

Freez-eez requires only 0.2 mL of gel to be applied to mucosal area. Freez-eez has a rapid onset within 30 seconds and a short duration with virtually no absorption.

Freez-eez is available in 4 flavours- Strawberry, Mint, Cherry, or Bubblegum.

- Fast-acting topical anesthetic gel
- Requires only a small amount for rapid anesthesia
- Short duration - freezing is non-invasive
- Great taste - no bitter aftertaste

*Fast-acting, delicious,
temporary pain relief!*
