

PRODUCT PROFILE

GEL 7

DIN 02042770

Product	2% Neutral Sodium Fluoride Gel
Description	A unique acid-free (pH 7) topical fluoride gel that is ideal for every patient. This thixotropic gel consists of 2% sodium fluoride to provide 1% fluoride ion.
Function	A topical anti-caries preparation designed specifically for use in the presence of crowns, bridges, composite restorations and orthodontia.
Packaging	450 mL bottle with convenient no-clog dispensing cap.

Features	Benefits
<i>Broad Patient Range</i>	Ideal for acid intolerant patients, those with reduced salivary flow due to chemotherapy, radiation or certain medications causing xerostomia. Ideal as a post whitening desensitizer.
<i>Ideal Adult Fluoride Therapy</i>	Aids in the protection of recurrent dental decay such as root caries and root exposure.
<i>Thixotropic Consistency</i>	Closer adherence to enamel and interproximal areas. No overflow in mouth or throat.
<i>Safe Caries Protection</i>	No dulling or etching on porcelain or composite restorations, crown and bridge work. Results in safe and effective caries prevention.
<i>Great Tasting</i>	Does not cause nausea or gagging for improved patient comfort and acceptance. Available in a variety of flavours as well as unflavoured.
<i>Improved Patient Compliance</i>	Ideal for taste-sensitive patients who cannot tolerate APF gels.
