

GELTRAYS

Comfort Fit Disposable Geltrays

Geltrays that maximize fluoride delivery and patient comfort.

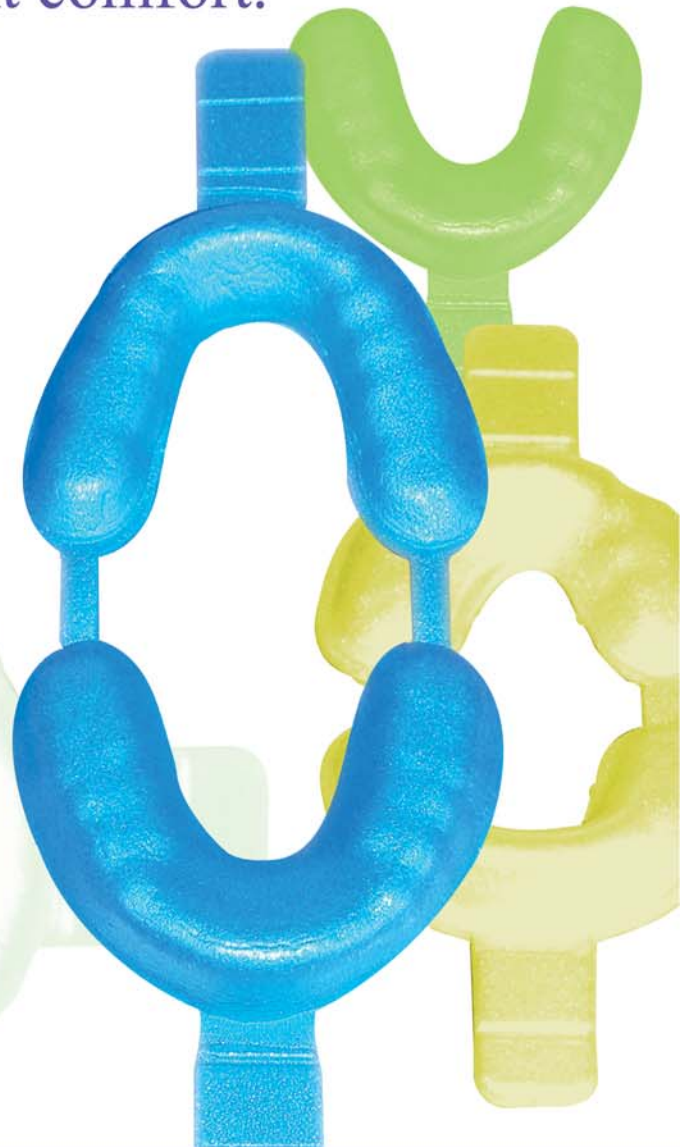

Ideal for use with all topical fluorides, Germiphene Geltrays are made with closed-cell foam that won't absorb product away from the patient's teeth. The unique design is anatomically contoured to prevent gagging and gel overflow, and keeps fluoride where it matters most - on enameled surfaces, particularly interproximally.

Germiphene Geltrays are available in both hinged and singles, and are colour coded by size. Single trays have easy identification of uppers and lowers.

- **LATEX FREE**
- Closed-cell foam will not absorb fluoride.
- Depth of tray ensures coverage of cervical areas.
- Long tray tab for easy, clean insertion and removal.
- Single trays are dual colour coded for quick identification.

Comfortable, efficient fluoride treatments!
