

# PRODUCT PROFILE

## Gobble Plus

<b>Product</b>	Liquid Concentrate Evacuation System Cleaner
<b>Description</b>	An effective combination of enzyme-creating bacteria and super charged cleaning agents which immediately break down and “eat” organic matter leaving your suction lines clean and deodorized.
<b>Function</b>	<b>GOBBLE PLUS</b> will immediately attack and dissolve organic waste and other residue in the entire evacuation system to keep it thoroughly clean and deodorized.
<b>Packaging</b>	2 Litre Tip'n Measure Bottle 10 Litre TerraPak recyclable container

Features	Benefits
<i>Easy-to-use</i>	Simply tip the bottle to fill the upper chamber with 30 mL of concentrate and add water to fill the chamber to 120 mL. <b>GOBBLE PLUS</b> should be aspirated through the lines daily at the end of the working day.
<i>Complete Multi-Action Biochemical Formulation</i>	<b>GOBBLE PLUS</b> is a unique newly developed formulation consisting of a synergistic blend of three selected Bacillus microorganisms and “super charged” cleaning agents. The bio-strain blend was specifically designed to promote optimum enzymatic and cleaning activity. <b>GOBBLE PLUS</b> 's synergistic bio-strain has superior germination, dramatically inhibiting hazardous micro-organism development.
<i>Continuous Residual Action</i>	<b>GOBBLE PLUS</b> 's special bacteria are enzyme factories which convert organic matter into carbon dioxide and water. <b>GOBBLE PLUS</b> 's bacteria carry a negative charge as does the evacuation line surface. Organic substrates carry a positive charge and are bonded to the interior of the line surface. Once <b>GOBBLE PLUS</b> is introduced, the organic waste becomes attracted to the bacterial negative charge. Immediately the bacteria begin to produce enzymes which break down and destroy the waste. During the process, the bacteria produce polysaccharides which allow the bacteria to adhere to the interior of the line surface without damaging the tubing. This provides a residual cleaning action for the entire evacuation system.
<i>Non-Foaming Amalgam Separator Compatible</i>	<b>GOBBLE PLUS</b> is a non-foaming formula that does not damage the vacuum pump while cleaning the entire system. <b>GOBBLE PLUS</b> is amalgam separator friendly, with a pH range of 7-9.
<i>Deodorizes as it Cleans</i>	<b>GOBBLE PLUS</b> ensures a level of protection that cannot be matched by any other evacuation system cleaner that simply masks odours. <b>GOBBLE PLUS</b> deodorizes as it cleans by out-competing odour-causing bacteria.
<i>Fresh Scent</i>	<b>GOBBLE PLUS</b> leaves a fresh, clean scent at the solids trap and throughout the entire evacuation system.
<i>Reduces Risk of Cross Contamination</i>	Evacuation system cleaning is an integral part of a complete asepsis system. The tubing and piping of the evacuation system are a breeding ground for bacteria. This dark, warm and moist environment is highly conducive to the harbouring and growth of disease-causing micro-organisms.
<i>Environmentally Friendly</i>	Research on <b>GOBBLE PLUS</b> has produced an unsurpassed, safe and natural solution to eliminate organic waste without harming plastic or the environment. Surfactants used in <b>GOBBLE PLUS</b> do not contain nonylphenol ethoxylates (NPE's)
<i>Protection and Peace of Mind</i>	An evacuation system cleaner is essential to the safe and effective operation of every dental practice. Regular use of <b>GOBBLE PLUS</b> reduces the presence of disease causing bacteria, offensive odours and can reduce the chance of system failure resulting in a costly service call.
