

PRODUCT PROFILE

IC-GEL

DIN 02238250

Product	Instant Antiseptic Skin Gel
Description	Non-irritating, moisturizing antimicrobial handwash which sanitizes and disinfects hands quickly without water. The 70% ethyl alcohol provides virtually complete, immediate antimicrobial action.
Function	Provides antiseptic action against a wide range of microorganisms, including gram positive and gram negative bacteria, viruses, fungi and yeasts.
Packaging	115 ml pocket size, 480 ml pumpette, 2L bottle.

Features	Benefits
<i>Convenient</i>	IC-GEL is a ready-to-use ethanol-based gel designed primarily for situations such as between patient contacts and involvement in procedures requiring hand hygiene, where no scrub sinks are available or where return to the sink is inconvenient or time consuming. Ideal size available to fit easily into a pocket.
<i>Extremely Efficacious</i>	IC-GEL provides broad spectrum germicidal action effective in reducing transient bacterial and viral contamination. It is extremely effective against a wide range of pathogenic microorganisms, killing 99.99% in 15 to 30 seconds. Evaporates quickly, and cleaning effect lasts long after application.
<i>Economical</i>	Eliminates needless time spent on travel to and from the sink. Saves time and money by eliminating towels, water and disposal costs. Costs just pennies per application.
<i>Saves Time</i>	IC-GEL will save time because it can be used anywhere, anytime. The whole procedure for using IC-GEL takes only 15-30 seconds. Compare this to the average 2.5 to 3.5 minutes required to go to a sink and thoroughly cleanse hands, washing and drying.
<i>Safe</i>	IC-GEL is clear and non-staining. It may be used with confidence knowing it does not leave any harmful or irritating residue behind.
<i>Gentle</i>	The combination of humectants offers superior moisturizing and counteracts drying effects of the ethanol. Conditions skin while helping to guard against dermatological problems. Clear, non-staining and non-greasy.
<i>Compliance</i>	Helps employers provide an appropriate antiseptic hand cleanser in conjunction with clean cloth/paper towels when provision of handwashing facilities is not feasible.
