

# PRODUCT PROFILE

## ORO-MIN

DIN 02240336

<b>Product</b>	Remineralizing Solution or Gel
<b>Description</b>	An alcohol free dental rinse containing all the naturally occurring mineral ions found in healthy tooth enamel and dentin.
<b>Function</b>	Used as a daily treatment for the hardening of teeth and the remineralization of softened teeth.
<b>Packaging</b>	Soft Mint solution 500 ml and Soft Mint gel 60 ml

Features	Benefits
<i>Effective</i>	<b>ORO-MIN</b> contains calcium, sodium, fluoride, phosphate and magnesium which form hydroxyapatite and fluoroapatite on teeth enamel, thus reducing demineralization and helping promote remineralization.
<i>Helps Reduce Tooth Decay</i>	<b>ORO-MIN</b> has a buffer effect to neutralize plaque acids. Hardens tooth enamel by removing acids and increases the rate of clearance of cariogenic material from the mouth.
<i>Contains Low Concentration Of Fluoride Ion</i>	Its low concentration of fluoride ions enhances the enamel resistance to plaque acids, mainly on surfaces that are under continual caries challenge.
<i>Pleasant Taste</i>	Soft Mint flavoured, alcohol free solution results in high patient compliance.
<i>Indications</i>	<ul style="list-style-type: none"><li>~ Reversing badly decalcified surfaces</li><li>~ Incipient or early caries, particularly interproximally</li><li>~ In cases of induced or disorder related Xerostomia</li><li>~ Ex-ortho patients especially where bonding directly to the enamel surfaces has left a badly damaged outer enamel layer</li></ul>
