

# ZAP AEROSOL

## Topical Anesthetic Spray

Fast-acting meterdosed spray: effective in 30 seconds with a 15 minute duration.

Zap topical anesthetic spray minimizes pain and discomfort in oral mucosal tissue. Zap reduces the discomfort of needle punctures, deep scaling procedures, prosthetic adjustments, clamp or crown placements, primary dentition extractions and suture removals. Zap can also be used to reduce gag reflex associated with placing dental materials such as impression trays and x-ray films into the oral cavity.

The disposable applicator tubes attach to the spray nozzle and allow the product to be dispensed directly where needed, even in hard to reach places in the mouth. The spray is released in controlled amounts, reducing wastage while increasing efficiency.

- Topical anesthesia within 30 seconds
- Topical anesthesia for a minimum of 15 minutes
- Applicator tubes dispense product directly where needed
- Meterdosed 60 ml spray bottle
- In Cool Mint or Strawberry Ice flavour

*Maximize patient comfort and minimize pain!*
